Learn from a professional about how to identify energy wasting and heat-stealing secrets your home may be hiding from you. The workshop will cover the topics of air sealing, insulation, windows, furnaces, water heaters, appliances and lighting. We'll also give you the latest scoop about new utility rebates--up to \$4,000!--that will help you cover the investment to make your home more efficient, more comfortable and less wasteful. Our trainer, Charlie Rogers, brings 6 years of experience working with homes like yours, reducing home energy use by an average of 30% per home.
