NEW YORK TIMES BESTSELLER

DRAWDOWN

THE MOST COMPREHENSIVE
PLAN EVER PROPOSED TO
REVERSE GLOBAL WARMING
EDITED BY PAUL HAWKEN

Project Drawdown is a nonprofit organization and coalition of scholars, scientists, entrepreneurs, and advocates from across the globe that is mapping, measuring, modeling, and communicating about a collective array of substantive solutions to global warming, with the goal of reaching drawdown.

Drawdown is the point in time **when the concentration of greenhouse gases** in the Earth's atmosphere **begins to decline on a year-to-year basis**. Project Drawdown has developed realistic, solution-specific models, technical assessments, and policy memos projecting the financial and climate impacts of existing solutions **deployed at scale over the next thirty years**.

Drawdown Solutions by Sector

Our Food

1. Throw away less food **495**
2. Eat a plant heavy diet **464**
3. Cook over clean stoves **111**
4. Compost your waste **16**

How We Move People and Goods

1. Drive an electric car **75.7**
2. Ship goods more efficiently **55.2**
3. Fly less – & on fuel-saving planes **35.4**
4. Invest in high-speed trains **10.7**

Our Homes and Cities

1. Switch to LED bulbs **58.4**
2. Design more walkable cities **20.5**
3. Use smart thermostats **18.4**
4. Install green roofs **5.4**

How We Use Our Land

1. Protect & restore tropical forests **429**
2. Plant more bamboo **50.6**
3. Return land to indigenous people **43.4**
4. Preserve coastal wetlands **5.4**

Electricity Use

1. Harness wind energy on land **593**
2. Build solar farm **259**
3. Invest in nuclear power **113**
4. Capture the power of waves **64.5**

Drawdown Solutions by Sector

Materials and Waste Management

1. Clean up chemicals in our refrigerators and air conditioners **629**
2. Build with “greener” cement compounds **46.9**
3. Use water more efficiently **32.3**
4. Increase household recycling **19.4**

Empowering Women

1. Educate girls **361**
2. Increase access to family planning **361**
3. Close the gender gap in small-scale farming **14.4**

The Top 5!!

1. Manage refrigeration chemicals **629**
2. Install onshore wind turbines **593**
3. Cut down on food waste **495**
4. Eat more plants **464**
5. Restore our tropical forests **429**

Featured Solutions

COMING ATTRACTIONS

MARINE PERMACULTURE

Marine permaculture utilizes floating, latticed structures designed to grow rich kelp forests and foster marine life. It could sequester billions of tons of carbon dioxide.

WOMEN AND GIRLS

WOMEN SMALLHOLDERS

If women smallholders receive equal farming resources and land rights, their yields will rise by 20 to 30 percent, avoiding emissions from deforestation.

MATERIALS

REFRIGERANT MANAGEMENT

The primary chemical refrigerant, HFCs, is a potent greenhouse gas. Emissions are avoided by managing leaks and disposal and by phasing out the use of HFCs.

[Show All](#)

LAND USE

AFFORESTATION

Afforestation—creating forests where there were none before—creates a carbon sink, drawing in and holding on to carbon and distributing it into the soil.

TRANSPORT

AIRPLANES

The airline industry produces at minimum 2.5 percent of emissions, and it is growing. Fuel efficiency measures are on the rise to reduce that impact.

MATERIALS

ALTERNATIVE CEMENT

Cement, a vital material for infrastructure, generates 5 to 6 percent of annual emissions. The key strategy to reduce them is to change its composition.
